

A MISCELLANY OF FACTS about our timber based operations
for an explanation of acronyms please scroll to the bottom of the listing
Statistical information is less than one year old unless stated otherwise

MF*	SI**	The Facts
1	141	In our main upstream operational area, 64.7% of our employees are from truly local communities (i.e.they are from within the actual timber licence areas (FTLs). (May 2022)
2	141	In our main upstream operational area, 88.5% of our employees are from local communities (i.e. they are either from within the actual timber licence areas (FTLs) or are close neighbours to them. (May 2022)
3	136-148	The percentage of women from the truly local communities and on our upstream payroll is 7.4% (May 2022)
4		The average number of trees harvested from one hectare - 7.0 trees (for Coupe 1, Ravenscourt FMU)
5	136-148	In the Refor nurseries 81% of all employees are women (Jan 2022)
6	136	Women represent 34% of the general worker downstream total workforce; this increases to 52% when foreign workers are excluded. (Jan 2022)
7	43	100% of our natural forest log production comes from areas that are certified either under PEFC/MTCS or STLVS.
8	1	The Samling Group only holds licences for forest resources in Sarawak, Malaysia..
9	63	In our HCV assessment reports the species identified are allocated to the RTE categories of IUCN, CITES and Sarawak Red List
10	13	Our Group wood products distributor in India is: Xylos Arteriors India Private Limited
11	30	As of May 2022, in Malaysia, Samling has only one operating sawmill located in Bintulu, Sarawak, Grand Paragon Sdn Bhd and a non controlling share in a sawmill located in Kuala Baram, Miri, Rimalco Sdn Bhd, operated by a third party at arm’s length. All other non-active sawmill has been disbanded. Outside Malaysia, there is only one other owned sawmill located in Guyana in the Land of Canaan, under Barama Company Limited and it is currently not in operation.
11	30	Miri Sawmills located together at: Google Earth/Map coordinates : 4°34'28.6"N 113°59'14.0"E
12	30	Bintulu Sawmill located at: Google Earth/Map coordinates :3°09'24.1"N 113°04'06.6"E
12	30	Guyana sawmill is located at Google Earth/Map coordinates: 6.5949° N 58.2079° W
13	60	Approximately 66% of the area of our Forest Timber Licences (FTLs) lies within the Heart of Borneo.
14	43	Of our total area of natural forest and industrial tree plantation 56.3% is 3rd party verified as legal source, either under STLVS or PEFC/MTCS
15	50	The total gross area of our forest resource (natural forest and ITP within the LPFs) is 1,350,584 ha. Of this total, 29.5% is certified under PEFC/MTCS (358,592 ha being natural forest and 40,139 ha being industrial tree plantation -ITP). Of the balance, 26.8% is certified under STLVS.
16	44	The FDS has stated that by the end December 2022 all long term forest timber licences must have forest management certification.
17		Where our ITPs, or parts of them, are not PEFC/MTCS certified then Samling commits to obtaining PEFC Controlled Source status for such areas.
18	87	It is planned that just over 22% of the gross area of the LPFs allocated to ITP will actually be planted. Unplanted areas include: conservation areas, HCV, wetland, steep & rocky water catchments, buffer zones etc.
19	87	Just over 10% of our planted ITP area is on peat soil.
20	7	The Samling Group, through its Reforestation division, is a member of the Borneo Forestry Cooperative (BFC). One of BFC's main objectives is to facilitate R&D among members and disseminate the findings.
21	153	The average wage of all workers in our Sarawak downstream operations is 17% above the current level required by the Minimum Wage Order 2020. (January, 2022)

22	154	Salaries of female supervisors in our Sarawak downstream operations are 72% of the level of their male counterparts. (Jan 2022)
23	154	Wages of female workers in our Sarawak downstream operations are 82% of the level of their male counterparts. (Jan 2022)
24	89	In our tree plantations, slopes of 35° and more are not planted. They are designated as Special Management Zones (SMZ) and set aside for protection as conservation areas.
25	166/167	Samling mills and operations engage suppliers on legal requirements by notifying on Samling's stand on legal source requirements, and that Samling shall have no direct or indirect involvement in unacceptable forest activities by suppliers who are not complying with local, national or international legislation, and or not complying with legislation of the country of harvest relating to trade and customs. All suppliers are engaged on the need for legal sources requirements. This process, where Chains of Custody (CoC) are applicable, is verified during the CoC audit undertaken by the accredited CBs.
26		Samling was the first private company in Sarawak to obtain forest management certification for a forest timber licence (FTL).
27		Samling was the first private company in Sarawak to obtain forest management certification for a fully operational Licence for Planted Forest (LPF).
28	49	The company is committed to sourcing its ITP logs from FSC-CW, PEFC-FM, PEFC-CS and from legal source
29	43	70% of our current ITP production area is under PEFC endorsed MTCS
30	101	We are committed to the journey to reduce GHG emissions and this is shown in our first Annual Sustainability Report 2020. Pellets have started via Control Union.
31	99	Our natural forest harvesting operations have an average GHG intensity 57kg CO2e/m3 to log pond.
32	120	In 2021 the average rate of herbicide application was 5.8l/ha (glyphosate) and 96.9g/ha (metsulfuron); for fertiliser - 81.8 kg/ha.
33	175	Samling has a Group Tax Department headed by a group tax officer reporting to the Group CFO who is responsible for management of tax, review of tax practices and tax payments to governments, to ensure that the company's tax obligation is fulfilled. Samling also engages KPMG Tax and Deloitte Tax to review and check on the Group's tax compliance as well as advise on tax matters.
34	84 & others	In 2021, 70% of 3rd party ITP logs is from a single supplier - KTS Logs Marketing Sdn. Bhd. FSC-C120238. Cert Code - SGSHK-COC-450013 controlled wood
35	154	Women's wages in the Refor nurseries and offices average 89% of the male wages (Jan 2022)
36	153	Average wage in Refor nurseries and offices was 5% above the minimum wage (Jan 2022)
37	45	In 2020 66.6% of the Group's round log volume traded/processed was certified as PEFC/MTCS-FMC, FSC-CW/COC or STLVS. The balance being legal source but not certified as such.
38	150	Women employees represent 29% of the Group's worldwide timber based workforce.
39	99	Our tree plantation (ITP) operations have an average GHG intensity of 29kg CO2e/m3 to log pond.
40	102	GHG computation: (litres of diesel consumed in year/annual log production delivered to log pond or mill)*2.72 = kg CO2e/m3 log delivered
41	151	There is a Minimum Wage Order in Malaysia dd 2020 now in force: Similarly both Guyana & Russia have similar legislation with which Samling complies
42	14	
43	23	
44	42	Samling only controls & manages forests in Sarawak, Malaysia.
45	87	Sarawak government require all eligible ITP to be certified by 2025
46	39	Starting April 2015, implementation of RIL is mandatory for licences committed for Forest Management Certification
47	84	None of our mills imports logs from other countries for processing in 2021 & 2022
48	84	KTS Timber Sdn Bhd is a major supplier of ITP logs (70% of third party logs) and is FSC-CW certified. On mineral soils; no peat planted
49	87	We are committed best practices on our mineral and peat soils.
4/7/2023		Miscellany of Facts 2023 _ 4 July 2023

49	94	KTS Timber Sdn Bhd is a major supplier of ITP logs (70% of 3rd party logs) and is FSC-CW certified.
50	97	KTS Timber Sdn Bhd confirmed that 2020 was exceptionally wet: no hotspot/fire was recorded
51	120	A sophisticated system combining the Geomaster and the ERP allows chemical use by block, LPF and in total, to be computed
52	126	The revised Human Rights policy now on the website will be distributed to upstream & downstream for all their notice boards.
53	134	We have a dedicated native liaison team with responsibility for community engagement
54	35	In 2021, Samling has 19 third party supplying mills, of which 11 are located in Malaysia
55	158	Accident Rate in 2020 was 2.17 per million manhours work and in 2021 was 1.38 per million manhours worked in Samling's forestry operations.
56	159	For 2020, 2021 and 2022, there were zero fatalities in Samling's forestry operations
57	167	Deliveries to all our mills are from legal sources with 67.4% being 3rd part certified as such.

58	173	Shearn Delamore, a well known Malaysian law firm, conducted webinars re Anti-Corruption & Anti-Bribery Laws on the 21 July 2020 & 19 Aug 2020. The industrial Relations (IR) Manager of Group HR conducted awareness programmes on all company policies including Human Rights Policy and Anti-Bribery Anti- Corruption Policy for the operations in Oct, Nov 2021 and April 2022.
59	21	As of 21 May 2021, we had 10 FMUs and 6 LPFs under ITP.
60	19	As of 21 May 2021 there were 226,537 ha HCV, conservation and protected area within our licence areas.
61	80	All timber & tree plantation licences must have an EIA undertaken by a third party approved by NREB before operations may start.
62	121	Fertiliser trials are now in hand Trial 254 (Marudi LPF & Trial 255 (Segan LPF) to assess optimum application rates
63	33	In Malaysia, the input source for the sawmill is 73% from own operations and balance from third parties supplies. Guyana sawmill has no sourcing as it is not in operation (May 2022)
64	157	Provision of appropriate PPE and related training is externally verified by DOSH registered Hygiene Technician during their periodic personal chemical monitoring reporting required by the Chemical Health Risk Assessment (CHRA) in compliance to the Malaysian Occupational Safety and Health (Use and Standards of Exposure of Chemicals Hazardous to Health) Regulations 2000. General provisions of PPE is verified by external auditors during PEFC annual audit.
65	96	2021 was exceedingly high rainfall year and no fires were recorded
66	104	Some upstream camps are now equipped with solar cell perimeter lighting to reduce the need for gensets operations at night. Baseline assessment of GHG emission is being carried out by consultant for pellet plant to enable planning and monitoring of GHG reduction (May 2022)
67	104	The Group has undertaken a GHG Inventory accounting for year 2022 in accordance to the GHG Protocol Corporate Accounting Reporting Standard, and covers all Scope 1 and Scope 2 GHG emissions that is within the operational control of the Group for its timber business segment. The GHG intensity tCO ₂ eq/m ³ equivalent of timber products output calculated as such is 0.10
68	108	The group engaged a third-party consultant (Eco-Ideal Consulting Sdn Bhd or “Eco-Ideal”) to conduct a GHG inventory on its scope 1 and scope 2 GHG emissions for year 2022. Eco-Ideal’s terms of reference is to ensure that the scope, coverage, methodologies, and verifications used in the exercise was in accordance with the GHG Protocol Corporate Accounting Reporting Standard, and the 2006 Intergovernmental Panel on Climate Change (IPCC) Guidelines for National Greenhouse Gas Inventories (“2006 IPCC Guidelines”) and the 2019 Refinement to the 2006 IPCC Guidelines.
69	155	The group has 1,151 fixed termed employees in the timber sector (May 2023).
70	169	In Saming, the process for engaging with suppliers on compliance involve a process of due-diligence covering notifying the company’s policy and legal requirements in the supply terms and conditions and the supplier’s acceptance of the purchase and supply agreement, and followed by a process of supplier assessment normally on annual basis or as the need arises from new information on the supplier. The assessment is to determine the suppliers’ performance and level of compliance to company’s requirement. The assessment(s) cover assessing feedbacks and information from internal source and external customers and stakeholders (if applicable), carrying out surveys on the suppliers to determine their current compliance to ESG practices, their plans for improvement (if any or necessary) and where there is negative end user/customer feedbacks, to assess the risks on the issue and to engage supplier to resolve the issues and where such issues are not amicably resolved over reasonable period, to inform termination of purchase and supply agreement to supplier as necessary.
71	170	In 2022, 100% of our wood suppliers in Malaysia are assessed internally by our timber procurement PIC on compliance to company and legal requirements.
72	172	For Sarawak operations, sourcing of 100% of supply from MTCS/PEFC source by 2025 is a commitment based on Forestry Authority’s target for all FMUs and ITPs wood source to be certified. Elsewhere such time-bound commitment will be based on the particular region’s practical supply of certified materials
73	173	In 2022. about 75% of direct and indirect wood supply for Saming are from FMU compliant with SFM practices.
74	58	Monitoring of deforestation (encroachment) and/or natural ecosystem conversion on all our FMUs is carried out in a number of ways: - via i) GIS team using satellite imagery (Sentinel-3) to detect land-use changes over the company’s entire forest areas in the process of updating FMUs’ mapping for General Harvesting Planning and Annual Forest Coupe renewal with Forestry Authorities ii) Monthly patrolling by company FMU managers and surveyors in their respective FMU boundaries and areas, iii) Engagement and surveillance by the company’s community liaison officers during their visits to local communities and intelligence gathering of information on any land use change activities. The company upon detection of any encroachment activities will investigate and report the cases to Forestry Authorities for further investigation and action. From 2020 to current period, the company has detected and recorded 168 cases of encroachment activities in our operation areas, and which were all reported to the Forestry Authorities (May 2023)

75	62	The company has been doing enrichment planting in line with the Restoration Program of Sarawak Forestry Department (FDS) to grant annual Permit to Enter Coupe (PEC). FDS Circular 2/2019 and SFC.100-1/9/6.4(09) mandates the requirement for Forest Timber Licence holders to carry out enrichment planting with indigenous species at degraded or cleared areas within the licensed areas. To facilitate this commitment and requirement, the company has established 4 indigenous species nurseries to cater for the production of seedlings for the restoration to areas degraded or cleared areas such as temporary log landings and log ponds which are no longer in use. Seedlings for this program are sourced from FDS. Since 2021, a total of 6.5 ha of the degraded area in our FMUs were restored.
----	----	---

MF* Miscellany of Facts reference number

SI**	SPOTT Indicator number (SPOTT - Sustainability Policy Transparency Toolkit - assesses commodity produces, processors and traders on their public disclosure on ESG matters.)
CITES	Convention on International Trade in Endangered Species of Wild Fauna and Flora
DOSH	Department of Safety and Health
FDS	Forest Department Sarawak
FMC	Forest Management Certification
FMU	Forest Management Unit
FTL	Forest Timber Licence (for natural forest)
GHG	Green House Gases
HCV	High Conservation Value
ITP	Industrial Tree Plantation
IUCN	International Union for the Conservation of Nature
LPF	Licence for Planted Forest
MTCS	Malaysian Timber Certification Scheme
PEFC	Programme for the Endorsement of Forest Certification
RTE	Rare, Threatened and Endangered [Species]
STLVS	Sarawak Timber Legality Verification Scheme
